Get Search URL

Get Search URL

Have you noticed this box at the top of your search results and wondered how you could use it? With the latest updates to Mandarin Oasis, this feature becomes even more useful.

Clicking on this button opens a small window that allows you to copy the exact address (URL) of your search. This URL can be pasted into an email or into a note for yourself. It becomes a link that allows that search to be reproduced.

An example of how this could be used:

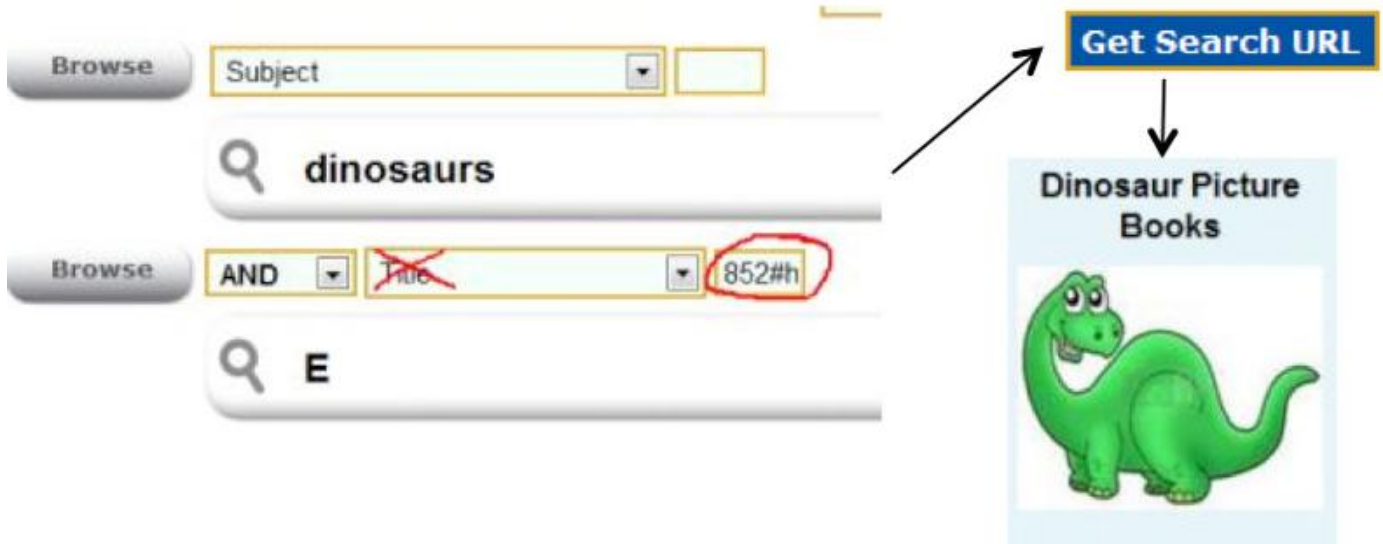

A patron loves to read historical fiction, especially if it's set in England in the 17th and 18th centuries. Because you understand how to combine search terms and how the appropriate subject headings are constructed, you can devise a search that returns a list of these items for her. Then you can save the search URL and email it to the patron. She can click on the link, or paste the URL into her browser and see the results again. Every time she uses the link, the results will also include any new materials that have been added, as well as showing her the current availability status of all the results.

In the latest version of Oasis, you can be even more specific in your search because you can save a search done while you are logged in as librarian. This means that you can use the ability to search any MARC field/subfield in Enhanced Search.

An example of how this could be used:

You can create a search strategy that includes searching for the subject 'dinosaurs' as well as for 'E' specifically in subfield h of field 852. Searching for 'E' in Local Call Number could return any book whose author name included E, whereas the specific field search identifies picture books. The search URL can then be pasted into the

appropriate spot in the Visual Search setup for a link component. Clicking on that button will allow children, teachers and parents to easily find picture books about dinosaurs.

For help with setting up or configuring your software, please contact Mandarin technical support at support@mlasolutions.com or 561 995 4010 opt 4
