How do you help your patrons use the OPAC?

The Mandarin team has seen examples of documents and webpages some of you have created to show your patrons the basic features of the Oasis/WebOPAC. Knowing how librarians are happy to help each other, we'd like to facilitate that.

Please send us copies of help sheets you use, or send us a link to a webpage you've posted. We'll compile these and allow other librarians to be inspired by your creations. (Please tell us if you'd rather not have your work copied totally. We will be sure to give you credit on any copies.) Send your examples to mandarinteam@mlasolutions.com
