Know Some Mandarin Utilities

CLEAN UP

This utility works with Mandarin M3 or Oasis to print barcodes and spine labels. Unlike the earlier Barcode utility, EasyLabel is connected to your database so that it can print smart barcodes that include the item's title and call number as well as the barcode and the library's name.

Features:

- Easy interface for printing barcode and spine labels.
- Choose to start printing from any label on the sheet.
- Create spine labels for LC or Dewey classification.
- Print smart patron or item barcodes.
- Designed to work with the most popular label formats.

EASY LABELS

This Utility works with Mandarin M3 to print "smart" barcodes and spine labels (smart barcodes include the library name, title, call number, and barcode) .

Easy interface for printing barcode and spine- labels.

Choose to start printing from any label on the sheet.

Create spine labels for LC classification; this utility will split the information from Field 852 subfields "h" and "i" when creating the label.

It will print "smart" patron barcodes.

Designed to work with the most popular label formats.

1. the link below and save the EasyLabel file. Then run it to install it.
2. eview the document Using Adobe® PDF reader

AUTO IMPORT

This utility helps your library keep patron information up to date. Automated Patron Import will import patron data files that are in tab or comma delimited format without requiring the user to do the import steps manually. Patron information from an administrative office outside the library, such as a registrar's or superintendent's office, can be dropped into a storage space. The program picks up this information at a regular interval set by the library. The data is checked for format and completeness before only new and changed records are automatically imported and mapped to the appropriate fields and subfields.

If you have any questions about the Mandarin Utilities, please contact us at support@mlasolutions.com or call 1 800 426 7477 or 1 561 995 4010
