How to use the Library Usage Module

Library Usage allows the library to maintain a registry of all patron visits, as well as to identify the type of activities for all visitors.

1. Allows the patron to register and select activities without the interaction of a librarian.
2. Contains a list of common library activities that is fully configurable by the individual library.
3. Allows the patron's barcode information to be entered manually or by using a scanner.
4. Provides options for registering an entire class or other group with one sign in.
5. Includes an extended list of modifiable reports to allow the librarian to analyze the activity in the library from different perspectives, and allows the addition of new reports.
6. Works with touch screen computers.
