Transactions Cleanup

Transaction maintenance is important because they will affect the statistics, inventory, and the way you manage your library.

In many libraries, we are finding that there are too many outstanding transactions. Sometimes the transactions go back many years. We are recommending that you check your "Library transactions" in circulation and change the status of items that have been stored for a long period of time.

Here is a link that will show you how to view your current transactions

EBooks!!

With COVID, we have seen an increase in our Mandarin librarians providing access to ebooks. Please click on the link below to see more details about how to best provide access Ebooks and online services.

Let's talk about Ebooks or online services in Mandarin

Release 5.7.7.2 (February 2021)

Advanced Cataloging

- Importing delimited bibliographic records is now improved. can now be imported successfully.

Catalog

- In an effort to improve performance, the maximum number of results that will be displayed is 100. The maximum number of results that will display on the Results page is 100. This change has been made to reduce the performance impact of large numbers of results on a page.
- We now use the Global Time Zone setting for the date and time stored in the Comment record. is now set based on the Global Time Zone setting.
- The Comments link on the Results page now takes the user to the Comments section of the Details page.
- Results will now be displayed for titles ending with an ")".A problem causing 'No Results' to be displayed when searching for a title ending in ').' has been corrected.
- Local cover images in saved lists will now be displayed. has been resolved.
- REMOVE: A problem affecting the calculation of the Item Availability in the Record Details view has been addressed.
- Title searched containing an apostrophe are now fully recognized and displayed. no longer truncated to the right on the apostrophe in the Search bar on the Results page.

Circulation.

- Holds/Reserves now handles holds when a patron is skipped over. for a hold has been addressed.
- Reserve are now converted to a hold after another hold was canceled on the same item.
- In the Library Transactions view a receipt-formatted slip can be printed for the selected transaction(s).
- In classroom mode, the grade dropdown has been improved. An issue affecting the Grade dropdown with certain types of data in Classroom Mode has been addressed.

Record Editor.

- Editing an existing patron without 852 subfield data no longer shows an ISN value in the Group membership field. The correct Group name is displayed when editing a patron record that does not contain 852 subfield data.
