

We are pleased to provide you our list of latest enhancements for your newest [Mandarin M5 v5.7.15](#) below

Advance Cataloging

1. **NEW FEATURE** based on numerous requests from you... A new special report "**Class Set Report**" has been implemented. It can be found in Find/Replace in "Cataloging Tools" . After doing any search, if you select "Class Set Report" it will show you all the holdings for each title from the search results and show you if it is available or not and who has it on loan.

Catalog

1. **NEW FEATURE** ...It is now possible to edit user comments before approving them.
2. UI improvements.
3. When adding a record, if the search type was changed from Standard to Equipment before the logon, Record Editor would load the Book template instead of Equipment.
4. The display of call number subfields for bibliographic records in Results and Details now obeys the details_call_subfields key.
5. Searching issues in Visual and Enhanced Search involving quoted text have been improved.

6. List downloads in MARC or RIS format now use the list name plus the .mrc or .ris extension, respectively.

7. Hold and Reserve emails generated from the Results view now include call number and barcode.

Circulation.

1. Partial fine payments from being applied in Return Mode has been addressed.

2. Carriage returns are now supported in the customized email notification text.

3. A scenario involving the Edit Bibliographic function that could cause an erroneous 'barcode not found' error, or an incorrect bibliographic record to display, is now handled.

Record Editor.

1. When saving a record, carriage returns in the subfield data will be replaced with spaces.

We continue to add new requested features and genuinely appreciate all of the feedback from our librarians around the world.

We hope these new Mandarin M5 features enhance your and your patrons' experience.

Please keep your suggestions coming and as always, we appreciate your ongoing support.
