Let Mandarin show you how to maximize your investment in Library Automation.

*To Our Valued Customers, Colleagues & Friends  
Throughout The World.*

It's that season again when many of us take time to look back and assess the closing year. We at Mandarin Library Automation understand that the economic situation for many libraries has continued to be stressful. We continue to work to lessen the stress for our customers by providing solid, robust, efficient programs at a very reasonable cost, along with exemplary customer service and technical support.

We also continue to develop our services to meet the needs of many types of libraries. One of our most exciting developments this year has been our ability to help libraries with automating through the use of our affordable Oasis hosting service. We are also excited about having Jennifer Nelson, LLC (<http://www.jennifer-nelson.com/>) represent Mandarin to international libraries worldwide, and our expanding relationship with Mitinet Corporation to provide even more data related services.

Early in 2011, Mandarin Library Automation will be unveiling a brand-new website, which we hope will provide our librarians even more easily accessible help and information. Look for us soon on Facebook, Twitter and LinkedIn for tips, continuous support and contact.

Early next year, we will also deliver the release of our newest updates to M3, WebOPAC and Oasis. Watch for the announcement early in the New Year!

We continue to value all our customers, and the entire Mandarin Library Automation team wishes you all a happy holiday season and a new year of peace and fulfillment.
