To Our Valued Customers, Colleagues & Friends Throughout The World

As 2009 nears a close, we at Mandarin Library Automation are looking back at a busy year. We know that it has been a difficult year financially for many libraries, and we have worked to offer you the highest quality products, service and support at the most reasonable price. Our team has continued to develop and refine M3 and Oasis, as well as the rest of our library automation suite, in order to fulfill our mission statement, "to facilitate access to information and ideas by providing affordable library management solutions."

One of our most exciting developments this year has been the introduction of patron interactivity in the OPAC with the ability to add comments and ratings to items in the catalog. As we look forward to the future, this will be an important area for new

features.

As always, we encourage your suggestions for making our software and services the most useful and efficient.

The entire team at Mandarin Library Automation would like to wish you a happy winter holiday season and a peaceful, stress-free and successful new year.
